

4 Courses

Introduction to Software Testing

Black-box and White-box Testing

Introduction to Automated Analysis

Web and Mobile Testing with Selenium

Oct 24, 2024

Jinash Jaleel

has successfully completed the online, non-credit Specialization

Software Testing and Automation

This Specialization is intended for beginning to intermediate software developers seeking to develop knowledge and skill in implementing testing techniques and tools in the development of their projects. Through four courses, you will cover black-box and white-box testing, automated testing, web & mobile testing, and formal testing theory and techniques, which will prepare to you to plan and perform effective testing of your software.
